Washing Instructions:
String Knit Gloves

String Knit Gloves are recommended to be washed with the following instructions to avoid shrinkage and prolong the life of the gloves.

1. Use commercial laundry soap or detergent that does not contain chlorine-based chemicals, bleach, or dry cleaning solutions. Oxi-clean or equivalent is the preferred detergent to avoid shrinkage of string knit gloves.
2. Machine wash in warm-hot water up to 400°F. Recommended to wash at 170°F for 15 minutes for optimal results.
3. Rinse in warm-hot water up to 400°F. Recommended to rinse at 170°F for 15 minutes for optimal results.
4. Recommended tumble dry at 170°F for 15 minutes for optimal results.
5. Repeat wash and rinse if gloves contain heavy dirt or grease. You may use several pieces of heavy canvas/cotton in the second wash to help remove deep grime from the gloves.

Special notes: String knit gloves may compress after wash and dry, but will still expand to fit the same size hand.
